

Editor

Computational Modelling

Prof. M. Cross

College of Engineering,
Swansea University, Singleton Park,
Swansea SA2 8PP, UK
m.cross@swansea.ac.uk

Associate Editors

Decision Sciences

Prof. A. Krishnamurthy

Department of Industrial and
Systems Engineering,
University of Wisconsin-Madison,
Madison, USA

Prof. C.J. Malmberg

Department of Decision Sciences
and Engineering Systems,
Rensselaer Polytechnic Institute,
Troy, New York, USA

Computational Fluid Dynamics Computational Modelling

Prof. N.C. Markatos

Department of Chemical
Engineering,
National Technical University
of Athens, Athens, Greece

Prof. J.I. Ramos

Departamento de Lenguajes
y Ciencias de la Computación,
Universidad de Málaga,
Málaga, Spain

Mathematical Modelling

Prof. I. Turner

Mathematical Sciences,
Faculty of Science and Technology,
Queensland University of Technology,
Australia

Structures and Optimisation

Prof. J. Sienz

College of Engineering,
Swansea University,
Swansea, UK

International Editorial Board

M.B. Abbott

International Institute for Hydraulic
and Environmental Engineering,
Delft, The Netherlands

R.J. Batterham

Research & Technology Development
Rio Tinto Limited,
Melbourne, Victoria, Australia

P. Bettess

School of Engineering,
University of Durham,
Durham, UK

J.L. Chenot

CEMEF, Ecole des Mines de Paris,
Sophia Antipolis, France

J.A. Dantzig

Department of Mechanical and
Industrial Engineering,
University of Illinois at Urbana-Champaign,
Urbana, Illinois, USA

R.P. Davis

Department of Industrial Engineering,
Clemson University,
Clemson, South Carolina, USA

F. Durst

Lehrstuhl für Strömungsmechanik,
Friedrich-Alexander Universität,
Erlangen, Germany

R.T. Fenner

Department of Mechanical Engineering,
Imperial College of Science,
Technology and Medicine,
London, UK

C.A.J. Fletcher

Centre for Advanced Computation in
Engineering and Science,
UNSW, Sydney, Australia

G. Maier

Department of Civil Engineering,
Milan Polytechnic, Milan, Italy

G.D. Mallinson

Department of Mechanical Engineering,
University of Auckland,
Auckland, New Zealand

S. McKee

Department of Mathematics,
University of Strathclyde,
Glasgow, UK

M.D. Mikhailov

Applied Mathematics Centre,
Sofia, Bulgaria

K. Morgan

Department of Civil Engineering,
University College of Swansea,
Swansea, UK

A.O. Moscardini

School of Mathematics and
Computer Studies,
University of Sunderland,
Sunderland, UK

J.C.J. Nihoul

Environmental Programme,
University of Liège, Liège, Belgium

S.V. Patankar

Department of Mechanical Engineering,
University of Minnesota,
Minneapolis, Minnesota, USA

K.A. Pericleous

Centre for Numerical Modelling
and Process Analysis,
University of Greenwich,
London, UK

H. Pina

Department of Mechanical
Engineering,
Escola Superior Tecnico,
Lisbon, Portugal

P. Schwarz

Division of Mineral Engineering,
Process Modelling and Developments,
CSIRO, Clayton South,
Victoria, Australia

D.B. Spalding

CHAM Ltd,
Wimbledon, London, UK

G. Symm

National Physical Laboratory,
Teddington, Middlesex, UK

M. Tanaka

Department of Mechanical
Engineering, Shinshu University,
Nagano, Japan

J.M.T. Thompson

Department of Civil and Municipal
Engineering, University College,
London, UK

V.R. Voller

Department of Civil Engineering,
University of Minnesota,
Minneapolis, Minnesota,
USA

Aims and Scope: *Applied Mathematical Modelling* is a monthly publication focusing on research related to the mathematical modelling of engineering and environmental processes, manufacturing, and industrial systems. A significant emerging area of research activity involves multiphysics processes, and contributions in this area are particularly encouraged. *Applied Mathematical Modelling* covers a wide spectrum of subjects including heat transfer, fluid mechanics, CFD, and transport phenomena; solid mechanics and mechanics of metals; electromagnets and MHD; reliability modelling and system optimization; finite volume, finite element, and boundary element procedures; decision sciences in an industrial and manufacturing context; civil engineering systems and structures; mineral and energy resources; relevant software engineering issues associated with CAD and CAE; and materials and metallurgical engineering.
